

KEY FEATURES

Generation3 incorporates Libra's 40+ years of industry expertise and knowledge to fulfill all your needs. This marriage of experience and latest software technology provides significant advantages:

- **Highly Configurable.** Generation3 provides the flexibility to structure the system to meet your exacting requirements. You will have the ability to:
 - Add fields to files
 - Set field lengths and labels
 - Make selector lists for field entries
 - Select data to be shown on transaction screens
 - Design your own reports
 - Layout tickets
- **Easy Upgrades.** Generation3's extensive configurability and modular design make moving up to the latest version quick and easy. You will have the ability to add all Generation3's latest features as they become available.

- **Seamless Integration.** The open database architecture, and adherence to the latest software standards make system integration and expansion quick and easy. Communicate with Libra's increasing line of office products or other third party office applications.
- **Simultaneous Operations.** Generation3 allows the flexibility to weigh trucks on multiple scales, access the system database files and communicate with the office -- all at the same time. The result is more production and greater profits.
