LRB1000/2000 Speed Switch
DIN Rail Mount or Stand Alone

- Dial-in calibration via rotary switches does not require power
- 1-100 and 10-1000 rpm set point ranges (others available)
- Built-in start delay and signal loss protection
- UL and CSA approved to applicable standards
- Single or double set point relay protection
- Fail-safe operation in overspeed or underspeed mode
- 5-Year Limited warranty on speed switches, sensors & ratemeters*

* Contact factory for more information

Description
The LRB-Series Speed Switches are complete rotation monitoring systems with one or two adjustable set points designed to detect unwanted overspeed, underspeed or stoppage of pumps, drive trains, screw conveyors, tail pulleys, fans/blowers, crushers and more. In the event of rotational failure, the LRB’s relay can be used for equipment shutdown or to provide an alarm. The standard LRB system includes either the LRB-1000 (1 set point) or LRB-2000 (2 set points) Speed Switch, a 906 Sensing Head and a 255 Pulser Disc. Electro Sensors Speed Switches bring efficiency and safety to your operations by preventing machine damage, product waste and costly downtime.

Principle of Operation
The LRB is supplied with a shaft-end mounted Pulser Disc (or optional split collar Pulser Wrap) which generates an alternating magnetic field that is picked up by our large-gap, non-contact sensor. The sensor transmits this speed signal as a digital pulse (frequency) to the switch via a 3-conductor shielded cable. The LRB decodes this frequency signal to determine shaft speed, and compares this to the pre-adjusted set point. The relay output can then be used for equipment shutdown or to provide an alarm, assuring machine protection and process integrity. The LRB is fail-safe; any malfunction during operation will de-energize the control circuit.

Product Information

Ideal for control cabinet mounting

Terminal Block
Stock No. 569-006100

907 Explosionproof Sensor
Stock No. 775-000600

906 Digital Sensor
Stock No. 775-000500

255 Pulser Disc
Stock No. 700-000200

Dimensional Drawings • LRB Series Speed Switches
**LRB-1000/2000 Speed Switch**

**Large-Gap Sensor Installation**
The standard sensor is supplied with a mounting bracket and two jam nuts, and is easily adjustable to achieve the proper gap distance. The optional explosionproof sensor is supplied with a slotted mounting bracket, also easily adjustable.

Sensors should be installed allowing the center of the magnets to pass in front of the center of the sensing head during rotation. The gap distance between the sensor and disc or wrap (dimension A in figures 1 & 2) is 3/8" ± 1/8". When using a standard 4" Pulser Disc, the center of the magnetized area of the disc (dimension B in Figure 1) is 1-3/4" from the center hole of the disc.

**Available Options**
- Explosionproof 907 sensing head.
- Split Collar Pulser Wrap for when end of shaft is inaccessible. Wraps available in the following materials:
  - PVC
  - Aluminum
  - Stainless Steel
- Stainless Steel Disc-Guards
- EZ100 Easy Mount Bracket Assembly for use with 907 Series explosionproof sensor (figure 3 below).

**LRB-1000/2000 Specifications**

**Input Power**
Voltage: 115Vac, 60 Hz std, 230 Vac, 12 Vdc, 24 Vdc optional

**Sensor Input Signal**
Type: NPN Open Collector
Amplitude: 5Vdc
Pull-Up: 4.7 K Ohms
Sensor Supply: 15 Vdc @ 50 mA max
Frequency Range: 0-666.67 Hz

**Set Point Data**
Number Available: One or Two
Actuation State: Under or Over Speed
Set Point Relays:
- LRB-1000: One form C, SPDT isolated 5A 115 Vac resistive
- LRB-2000: Two form C, SPDT isolated 5A 115 Vac resistive

**Set Point Adjustment**
Rotary Switches: (1) tens and (1) ones digit
Start Delay: 10 Seconds (fixed)
Hysteresis: 6%

**General Specifications**
Housing and Cover: NEMA 1
Electrical: Approved to UL 508 and CSA C22.2 #14-95 Standards
Mounting: DIN Rail Mount or Stand-Alone
906 Sensor: Aluminum 3/4" - 16 UNF body with 10 ft of 3-conductor shielded cable.
907 Explosproof Sensor: Cast Aluminum, CSA Approved.
Meets UL Class I, Group D, Class II, Groups E, F, G; Class III
255 Pulser Disc: Nylon, 12.4" diameter, 16 magnetic poles
Gap distance: 3/8" ± 1/8"
Operating Temperature: -40° C to +60° C

**LRB Special Options**
Special options are also available to modify the standard functions of LRB Series Switches, these include:
- Increased or decreased start delay interval
- No start delay
- Set point range
- Increased or decreased set point hysteresis
- Signal loss protection in overspeed mode
