

# VIBRATING TABLES

**Increase your Productivity and Profitability**

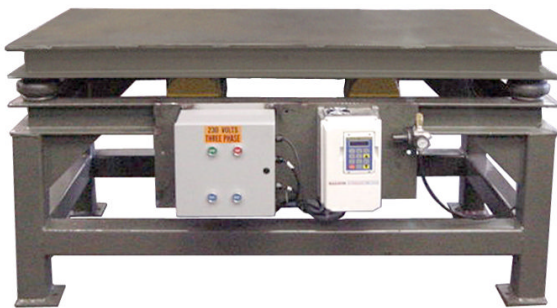

**Precast Concrete**

**Vibrate precast concrete molds for a better surface finish in less time.**

The use of a Houston Vibrator Vibrating Table will improve the surface finish of your precast concrete products while helping to improve your profitability by reducing production time and labor expenses and increasing your capacity.

**Packaging & Settling**

**Vibrate bulk bags and cartons to settle material during packaging.**

Use of a Houston Vibrator VTT Series Vibrating Table will quickly settle material in bulk bags, cartons, and drums. Higher density packaging means that more material can be shipped in a smaller space, saving on transportation costs.

**Features & Options**

A Vibrating Table from Houston Vibrator is a durable, dependable piece of equipment that will increase your productivity and profitability for years to come. All of our Vibrating Tables feature heavy duty construction using only high quality materials and components. Electric or Pneumatic Vibration is available.

Houston Vibrator offers four standard sizes, and can custom design your table to suit the special requirements of your application and your site.

**Standard Features:**

- Adjustable Air Isolation System
