

Martin® Roll Gen™ System

Self-contained, mini 24-Volt DC power station that generates enough power to run a wide variety of electronic systems and safety mechanisms.

Using kinetic energy from a moving conveyor belt, the Martin® Roll Gen™ System eliminates power production obstacles in remote locations.

Martin® Roll Gen™ System powers:

- Compressor for Air Tensioner
- Activation of Water Supply to Wash Box
- LED Lighting
- Initiation of Spray Bars
- Reversing Tracker Switching Mechanism
- Firing of an Air Cannon
- **Many Other Applications...**

Martin® Roll Gen™ System * consists of Martin® Roll Generator (covered by 3-Year Warranty) coupled with:

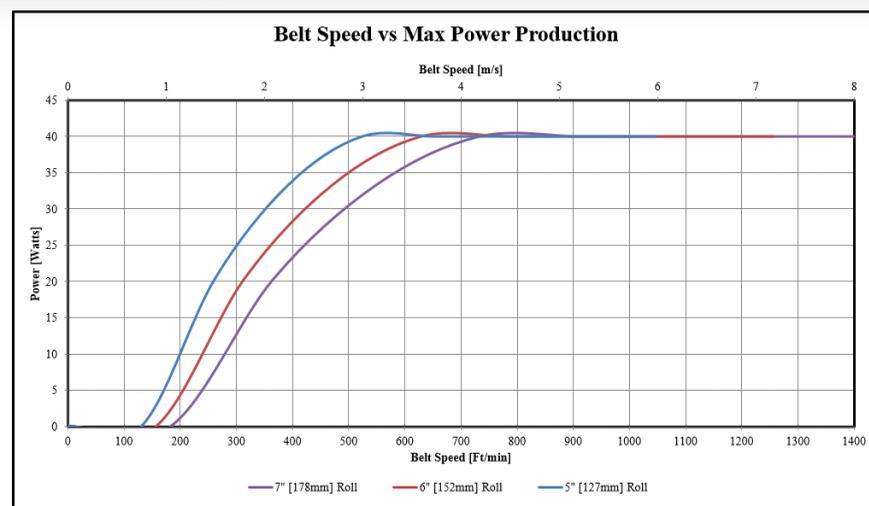

- Martin® Roll Gen™ Power Supply
- Martin® Roll Gen™ Continuous Power Supply (with battery)

* Mounted on Trac-Mount™ Idler Frame
