

# Pressure Drop Indicator Gauge

For All Inlet Filters & Filter Silencers

## Benefits

- ♦ Monitors Filter **Continuously**
- ♦ **Easy** Filter Maintenance
- ♦ Filter Element Life **Maximized**
- ♦ Downtime **Reduced**
- ♦ Graduated Restriction Readings

## Features & Specifications

Solberg's Filter Monitor Gauge shows the amount of filter element restriction and how much life the element has left. This is a convenient and inexpensive solution to receiving the maximum usage from every element.

The yellow indicator in the filter monitor gauge drops as the dirt accumulates on the filter element. The element is ready for change out or servicing when the yellow indicator reaches the red zone. This allows you to determine the condition of the filter element even after the equipment has been shut down.

The element should be serviced or replaced at the maximum noted pressure drop or at the manufacturer's recommended level.

Note: The monitor gauge has a 1/8" MPT connection. It is mounted either on the weatherhood or on the outlet pipe depending on the filter assembly.

## Monitor Status:

Part Numbers	Rating
VG-020-013	20" (500mm) H <sub>2</sub> O
VG-030-013	30" (750mm) H <sub>2</sub> O

Filter Gauge shows both mm & inches ratings
