

STANDLEY
BATCH SYSTEMS, INC.

DESIGN **BEYOND** CONVENTION

LEADING THE MATERIAL HANDLING
INDUSTRY FOR NEARLY 100 YEARS.

Whether you are limited on space, require complex color blending or need modern parts retrofit to an existing plant, the experts at Standley Batch Systems, Inc. will find or invent a solution.

For more information about Standley Batch products, call 1.800.325.8084 or email sales@standleybatch.com.

505 Aquamsi St. | Cape Girardeau, MO 63703

▪ **CONVEYORS** — Our conveyors ensure you receive an accurate discharge of aggregate when and where you need it. We can modify our conveying standards based on your plant's required layout.

▪ **MIXERS** — Distribute **rapid** pan, twin shaft and planetary mixers and stock a full line of **rapid** replacement parts.

▪ **AGGREGATE BINS** — Build high- or low-profile aggregate bins in the size and capacity needed for your materials.

▪ **CEMENT AND FLY ASH SILOS AND CEMENT BATCHING** — Fitted with aeration pads, emergency slide gates, 4" blow pipes complete with Kamlock adapters, PVR manways and dust collectors, our silos come in any size and capacity.

▪ **COLOR** — Our comprehensive Color Batch Systems can be designed to serve up to four mixers and deliver whatever you need in terms of color mix, batch size and speed.

▪ **AUTOMATION/CONTROLS** — Offer fully automated and totally coordinated systems with control panels to bring all stages of manufacturing — storage, measuring, blending and delivery — together to make your entire structure efficient.

▪ **REPLACEMENT PARTS** — Standley Batch is your best source for concrete batching equipment replacement parts for mixer paddles, liners and all other Standley concrete batching equipment.

▪ **CONVEYORS** — Our conveyors ensure you receive an accurate discharge of aggregate when and where you need it. We can modify our conveying standards based on your plant's required layout.

▪ **WEIGH BELT** — The weigh belt conveyor is mounted on load cells below the aggregate bins. Weigh belts accurately weigh aggregates batch after batch.

▪ **VOLUMETRIC FEEDER** — Volumetric feeders allow for accurate measuring and delivery of multiple types of aggregate simultaneously to a single transfer conveyor. Our volumetric feeders also allow for a speedy turnaround where one batching system may supply two or more mixers. Volumetric feeders will compensate for variations in moisture content of material to correct aggregate-to-cement ratio.
