THE BACKPACK

MOBILITY - THE ABILITY TO MOVE FREELY AND EASILY

The Back Pack Concrete Vibrators offer increased operator comfort, reliable performance, and reduces fatigue, without the use of an electric cord. Honda's 1.3 horsepower GX35 Mini-4 Stroke engine provides reliable power, with an all-position diaphragm carburetor for operation in any position without stalling. Both backpacks feature an ergonomic and comfortable double-strap shoulder harness.

Honda's GX50 general-purpose engine expands our Mini-Four Stroke lineup with a model that offers high output and light weight extending into more demanding commercial and rental applications with excellent fuel efficiency. Featuring a compact and lightweight design, the GX50 is the first Honda four-stroke model in the two-horsepower class that is 360-degrees inclinable during operation and storage.

FEATURES

- 4 Stroke - No Fuel / Oil Mixing
- Full 360* "Any-Side-Up" Operation
- Use and Store in Any Position
- Removable Throttle Allows Operator Ergonomic Comfort and Placement
- Easy Starting, Low Noise, Easy Maintenance, and Superb Acceleration
- Low Fuel and Oil Consumption
