

# Precision Temperature System

Achieve lowest-cost, predictable concrete temperature every time with COMMANDbatch Precision Temperature System. Accurately estimate the final temperature before batching the load and eliminate risk of wasted time in the yard.

## Improve Production

- Specify system-wide default temperatures, and/ or specify by individual mix design
- Out-of-range temperature notifications
- Temperature sensors for all types of materials available, or supply your own to meet system specifications
- Improve consistency of production/product quality

## Minimize costs

- Reduce costs spent on heating/chilling, ice/ liquid nitrogen
- Reduce in-yard time
- Reduce time adjusting loads

## Avert risk and waste

- Ensure products meet customer specs consistently
