

A red semi-truck is shown from a front-three-quarter view, positioned on a large, yellow, I-beam style concrete scale. The truck's cargo area is filled with a dark, granular material. The background is a bright blue sky with several white lightning bolts. The entire advertisement is framed by a thick red border.

THE MOST DEPENDABLE TRUCK SCALE YOU CAN BUY

SUPERB ACCURACY AND LONGEVITY IN HOSTILE ENVIRONMENTS

- *Pour-in-place concrete deck platform*
- *Models available for weighing sets of axles or entire trucks*
- *Impervious against lightning strikes and water damage*
- *Lifetime load cell warranty*
- *Low-profile or pit-type installations*
- *NTEP and Measurement Canada legal for trade*

Cardinal

BUILT TO STAND UP TO THE HARSHTEST ENVIRONMENTS

Cardinal Scale's ARMOR® truck scales with Guardian® hydraulic load cells are the smart choice for demanding applications like solid waste stations, quarries, grain elevators, chemical processing applications, and heavy construction.

Damage resulting from water, lightning and voltage surges, corrosion, rodents, shock loading, and extreme climatic conditions can dramatically increase the cost of ownership for your truck scale. Guardian® hydraulic load cells are covered under a true lifetime warranty against all of these issues protecting your investment.

TRUE LIFETIME LOAD CELL WARRANTY

Cardinal Scale manufactures their own stainless steel, IP68-rated, 75,000-lb-capacity Guardian® hydraulic load cells for their truck scales. These SST75 load cells carry a true lifetime warranty when installed in a Cardinal truck scale by an authorized Cardinal Scale dealer. They offer the highest level of protection possible against many of the conditions that adversely affect truck scales. Guardian® load cells can even operate fully submerged underwater!

Cardinal Scale's ARMOR® truck scales with Guardian® hydraulic load cells come in a wide variety of standard models available (listed on the back page), plus custom-engineered designs.

POUR-IN-PLACE CONCRETE DECK TRUCK SCALES FOR LOW-PROFILE OR PIT INSTALLATIONS

EXCLUSIVE CON-LOCK DECKS

The ARMOR's exclusive CON-LOCK concrete deck design is field ready for the pouring of concrete and features an exclusive flow-through design that alleviates the need for any rebar to be installed in the weighbridge.

The structural steel is shot blasted to an SSPC-SP10 condition to remove rust and mill scale, then protected with a baked-on, heavy-duty polyester anticorrosion tan powder paint for the highest quality and durable finish.

THE ULTIMATE HEAVY-DUTY TRUCK SCALE

SEVERE-DUTY RATED PROTECTION

- Immune to lightning and water damage
- 100,000-lb concentrated load capacity
- Operates in a wide range of extreme temperatures
- Boltless top access covers
- Integrated load cell pocket design
- Rugged 75,000-lb capacity stainless steel load cells

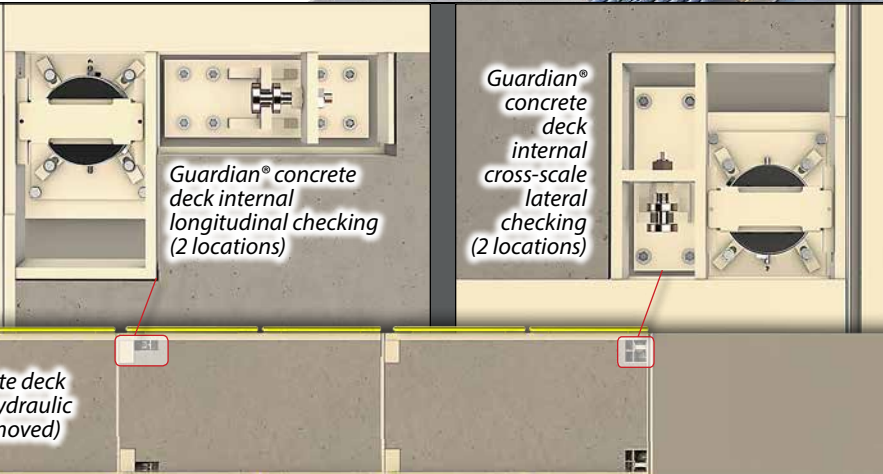

TOTALIZER JUNCTION BOX

The Guardian's pressure transducers, housed in the totalizer cabinet, are fluidly coupled to their SST hydraulic load cell counterparts and convert the pressure signal into an electrical signal which is sent to the scale's digital weight indicator in the scale house. You won't find any electrical circuits in an ARMOR® truck scale with Guardian® hydraulic load cells, so the load cells are immune to lightning damage and electrical surges. The fiberglass totalizer cabinet can be placed up to 20 feet from the edge of the weighbridge.

INTERNAL WEIGHBRIDGE CHECKING

Cardinal Scale's ARMOR® truck scale with Guardian® hydraulic load cells includes internal checking. The weighbridge uses a frictionless bumper bolt system. Four bolts (two lateral and two longitudinal) set the checking for the entire truck scale. Checking distances are pre-set at the factory, and due to the checking system's internal location, parts are less susceptible to heat, thermal expansion, weather, and harsh environments. The need for service checks is lowered due to the lack of exposure to external elements versus external checking systems.

Overhead view of a 70-ft-long concrete deck ARMOR® truck scale with Guardian® hydraulic load cells (checking access covers removed)

HYDRAULIC LOAD CELLS

Guardian® hydraulic stainless steel load cells are environmentally-sealed (IP68) for high-pressure washdowns and can operate fully submerged underwater for the highest protection rating possible.
