

Bolt Gripper Rails

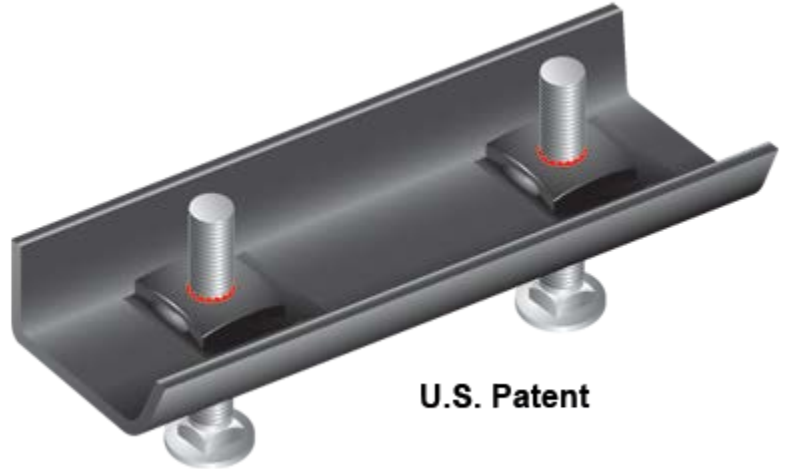

Colorado Wire Inc. offers the sand and gravel industry a complete line of screen rail products. The Herren Brand Heavy Duty Steel Clamp Down Rails are specifically designed to last longer than regular steel rails. The Herren Double Faced steel rail will outlast a regular steel rail up to 4 times.

A STANDARD FEATURE on all HERREN RAILS...

the BOLT GRIPPER that keeps bolts from falling out of the rails,

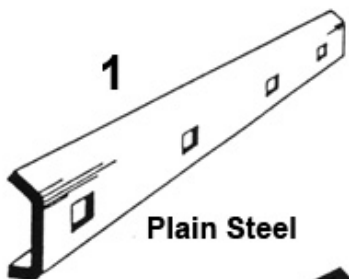

and the HOLE SUPPORT PATCH making your rails stronger... and easier to change

Cut Your Bolt Cost by 50%

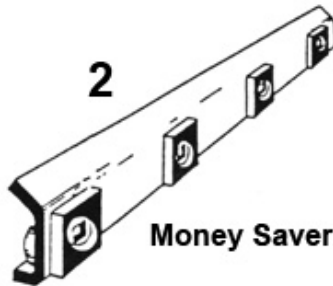

Insert paragraph about Bolt Gripper Rails here...

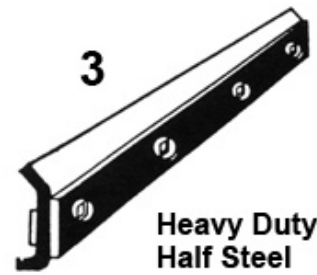

Available in Six Styles - Made to Manufacturers Dimensions

1 Plain Steel

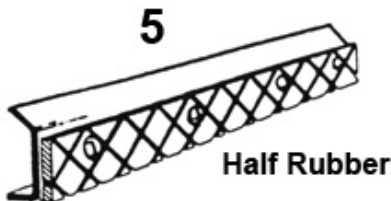

2 Money Saver

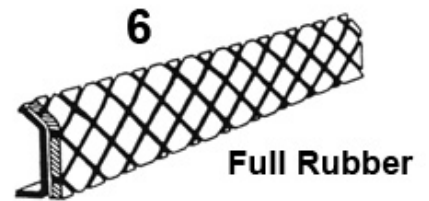

3 Heavy Duty Half Steel

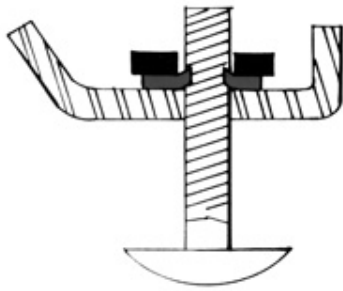

4 Heavy Duty Full Steel

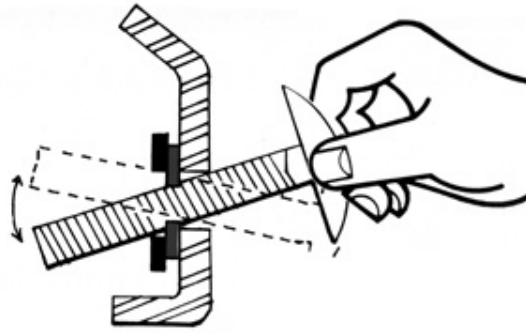

5 Half Rubber

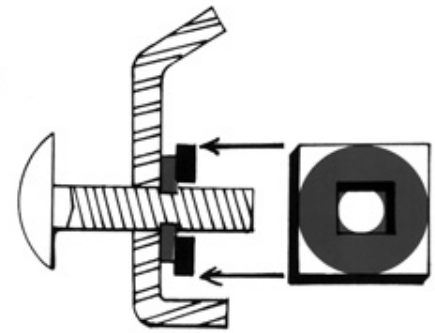

6 Full Rubber

The rubber **BOLT GRIPPER** prevents the bolts from falling out of the rail

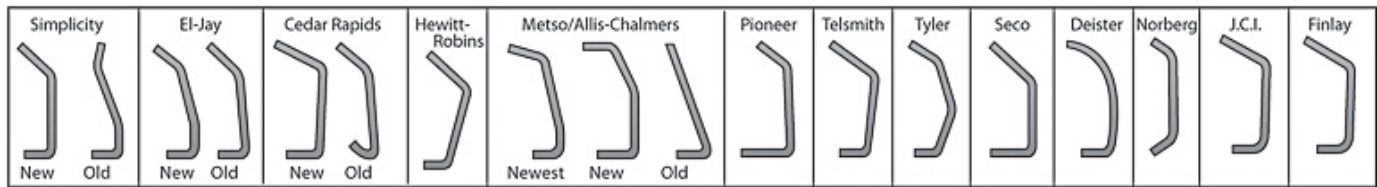

The bolt can easily be moved up and down, or back and forth for easy alignment

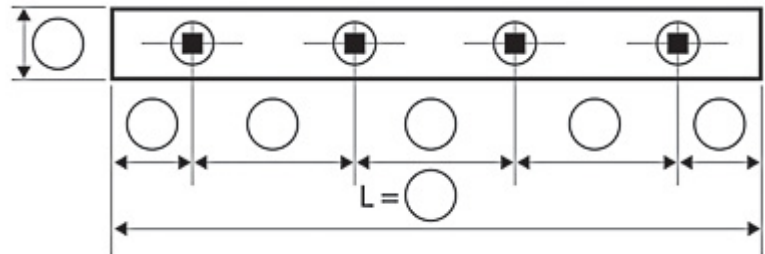

The 1/4" x 2" x 2" steel **BOLT HOLE SUPPORT PATCH** (with rubber bolt gripper under it) is welded on the inside of the rail giving it extra strength.

The **BOLT GRIPPER** and the **BOLT HOLE SUPPORT PATCH** is a **standard feature** on all the following original manufactured style rails, and any other manufactured styles.

When ordering or requesting a quote for **Bolt Gripper Rails**, you will need to make the following measurements

- Length (L)
- Number of holes
- Make of screen
- Bolt hole size
- Distance between holes
