

Martin® Farside Tension Adjuster

The Martin® Farside Tension Adjuster is designed to make maintenance of hard-to-reach secondary belt cleaners quick, simple, and safe.

The Martin® Farside Tension Adjuster improves maintenance safety by allowing workers to make adjustments from one side of the conveyor. This eliminates the need to climb over belts or rely on other unsafe methods to adjust the farside tensioner.

BENEFITS

Improves Safety

Farside tensioner can be adjusted from the operator's side eliminating the need to access the farside of the conveyor.

Improved Maintenance

Both tensioners can be adjusted from one location allowing for easier tensioner adjustments in less time.

Simple Installation

Mounting procedure is similar to Martin® SQC2S™ Square Mainframe Tensioners.

Built for Tough Conditions

The rugged telescoping shaft and enclosed gearbox are designed to operate in tough conditions.

Guaranteed

Like all Martin® Products, the Martin® Farside Tension Adjuster is covered by Martin Engineering's *Absolutely, Positively, No Excuses*, Guarantee.
