

Martin® Tornado Air Cannon

4-INCH VALVE

The **Martin® Tornado Air Cannon** produces better material flow with greater force, faster cycling, and improved safety. The Martin® Tornado Air Cannon fires when the exhaust valve opens in response to a positive surge of air sent by a tripped solenoid valve. This positive-acting valve amplifies the discharge force, up to 20% more force than a standard Martin® XHV Air Cannon of the same size.

PERFORMANCE DATA

Discharge Time

Martin® Tornado Exhaust Valve

Unit shown as cutaway to show internal parts.

BENEFITS

- Increased Safety
- Increased Force Output
- Suitable for High Temperatures
- Easy Installation and Maintenance
- Cycle Guarantee
- Faster Fill Times

Tank Fill Time*

Noise Level

* Data based on laboratory testing. Fill times may vary depending on air supply characteristics.

NOTES

Tanks for Martin® Air Cannons supplied by Martin Engineering are manufactured to ASME Code Rules, Section VIII, Division 1. Tanks are National Board registered and pressure vessel quality (PVQ).
