

Model 99 Brush Type Conveyor Belt Cleaner

ELIMINATE COSTLY DOWNTIME AND CLEAN-UP EXPENSES. STOP WEAR ON BELTS AND RETURN ROLLS CAUSED BY CARRYOVER!

- Helically formed open face brush construction - self cleaning, will not load.
- Disposable brush housing is quickly and easily changed when needed.
- Standard attaching assembly adjusts to fit any size conveyor.
- Drive can be mounted on either side for servicing.
- Helix design assures constant belt contact.
- Flexible cleaning action of bristles provides the smoothest, quietest, most thorough cleaning possible.
- The Model 99 brush cleaner is shipped complete - no need to purchase extra parts.

MODEL 99 FEATURES OUR HELICAL DESIGN BRUSH:

Our helical design assures a smooth, virtually noiseless brushing action due to constant brush contact with the cleaning surface. It is the only disposable type brush featuring a helical, totally enclosed aluminum solid face housing. If required, we can also supply brushes in straight face construction. Our standard bristles come in three diameters: .014, .028 and .040. A wet carryover requires a heavier bristle than a dry carryover. A heavy carryover, such as iron ore, would require the .040 bristle. A light carryover, such as cereal, would require the .014 bristle.

WHEN ORDERING: Please note bristle diameter required .014, .028 or .040. • Stainless steel, wire, or other brushes available. Prices on request. • Standard brush has twelve bristle rows, 10" diameter, 3" bristle trim length, helical design. For prices on sizes other than listed please contact the factory.

PRICE AND ORDERING INFORMATION

BRUSH CLEANER			BRUSH ASSEMBLY (shipped assembled). Includes bored castings, precision extruded, corrosion resistant brush sections, socket head screws.			REPLACEMENT BRUSH HOUSING Includes: Precision extruded corrosion resistant brush sections, socket head screws.
