

SURE SPEED[®]

PLEASE READ BEFORE OPERATING

When unit is switched to **ON** position, a slight **PAUSE** and a short **RAMP-UP** occur before reaching operating speed.

The *Sure Speed* motor “soft start” is designed to save energy and mechanical wear on the vibrator and your generating system.

- **Constant Speed** - The motor will run any existing Wyco vibrator shaft and head at a set speed regardless of the load applied by the concrete.
- **Powerful/Quiet** - High power capability to run proper speed/motor fan was designed to reduce decibels to meet OSHA A29 CFR 1910.95 noise requirement.
- **Safety Tested** - Meets UL60745, the highest electrical safety standards, for both double insulated and grounded motor construction.

For more information on any of the Sure Speed's features, visit us at www.wycotool.com/surespeed or contact us at 262-639-6770 or 800-233-9926.
