

U8A-15 Utility Air Winch

Description:

The Model U8A-15 is a rugged, economical tugger for use in the plant maintenance, construction, mining, oilfield, and marine industries. Engineered using heat treated high strength aluminum alloy the U8A-15 is a very lightweight and portable unit that can be handled by one man. An oil bath precision machined worm drive gearbox ensures positive load holding for excellent position control.

Standard Features:

- Lightweight aluminum alloy frame and drum construction
- Fully enclosed worm gearbox provides positive load holding and positioning characteristics
- Direct mounted reversing drum switch on electric models
- Self locking worm drive provides accurate load positioning and load holding when control handle is released
- Permanent bolt down and temporary lashing hooks for mounting versatility
- Cast aluminum carrying handles for easy portability
- Dual mufflers are standard for quieter operation
- Line Pull - 1,500 lbs at 1st layer**
- Speed - 40 fpm**

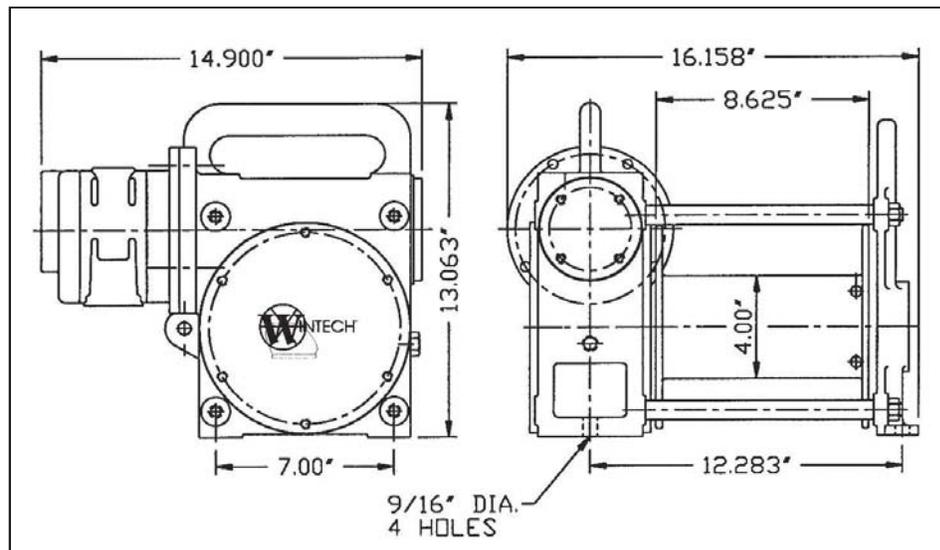

** Performance is based on air supply of 125 CFM @90 PSI

Optional Features:

- Hand held remote pendant with push button controls
- In-line filter/lubricator/regulator assembly
- Winch cables
- Extended drum lengths
