Introducing the NEW 994 Electric Motor Vibrator

Legendary Wyco Performance in a Package that Meets the NEW UL Standards

The NEW 994 electric motor vibrator builds on the legacy of the rugged and reliable 992A and 993 series. With all the features you expect on the jobsite, the 994 is ready to tackle your toughest consolidation jobs. The 994 was designed to incorporate the latest features from our SureSpeed™ line, including a cast quick-disconnect, rugged molded motor enclosure, durable electrical switch, and easy-to-service motor brushes.

The 994 also meets the highest safety standards in the industry – with UL 60745 Electrical Certification and OSHA 29 CFR 1919.95 for noise levels.

994 Benefits:

- One motor for all your consolidation needs - drives any head and shaft combination
- Conforms to all current UL and OSHA regulations for safety
- High-efficiency design powers through your most challenging head and shaft combinations
- Cast quick disconnect for fast and easy head and shaft changes without tools
- Lightweight, powerful, ergonomic design that's built to last

NEW motor design conforms to all current safety regulations

Innovative quick-disconnect for fast and easy head and shaft changes, without tools!

Your Partner in Concrete Consolidation, Since 1941

Wyco has been leading the development of innovative tools for the most demanding concrete consolidation applications for over 70 years. In that time, we've worked with the industry to provide you with the best tools for your toughest jobs. Starting in 1941 with the development of our first gas-powered flexible shaft vibrator through the development of the industry's only patented Square Head™ vibrator design to the launch of our new SureSpeed constant speed electric vibrator motor, Wyco has led the way in innovative, durable concrete consolidation tools.

Today, Wyco continues to monitor mix and material compatibilities in the concrete industry and the dynamics of placement by vibration. Our team is proud of our company's long history, and we are excited to continue the company's tradition of innovation, for the industry and for our customers.

Wyco designs, builds and tests all our products in Racine, WI, USA at our state of the art ISO 9001 certified headquarters. Using sophisticated computerized manufacturing and quality assurance equipment, we build tools made to last and stand behind every product. Our commitment to leading regulatory standards like UL, CSA and OSHA led to the introduction of the first UL/CSA approved concrete vibrator in 1986.
